

## iProcess

Take your storefront with you wherever you go with the iProcess mobile application. With iProcess, merchants can quickly take payments on their personal Android or iOS phone. Simple and easy to use, they can run a transaction, add tips, or even issue a refund.

iProcess is fully integrated into NMI's Customer Vault, so merchants can initiate a transaction using previously saved credit card details. It's also easy to add new cards straight into the Customer Vault for future convenience. The Customer Vault also has optional features like Automatic Card Updater that ensures cards are always up to date.

Merchants can also pair iProcess with one of the several EMV devices and take advantage of better transaction rates and the increased protection EMV technology provides.

### Features

- Add multiple MIDs inside the iProcess mobile application
- Email or text receipts to a customer
- Display location geotag on a receipt
- Capture digital signatures and add tip amount if needed
- Perform full or partial refund via Transaction History Log
- Application is free to download and no additional per-transaction fees apply. Usage fees may apply.

### Benefits

- Integration with the Customer Vault keeps customer details stored for future transactions
- Compatible with most popular mobile platforms: Apple and Android
- Encrypted swipe hardware so credit card details never touch your phone
- Keyed, swiped, EMV and contactless support when used with terminals
- Ready-to-go terminal: bbpos Chipper 2X BT
